Electronics and Power

THE JOURNAL OF THE INSTITUTION OF ELECTRICAL ENGINEERS

VOLUME 27 1981

1-112	January
113-192	February
193-264	March
265-344	April
345-428	May
429-508	June
509-576	July/August
577-672	September
673-764	October
765-846	November/December

The IEE is not as a body responsible for the opinions expressed in 'Electronics & Power', unless it is stated than an article or a letter officially represents the Council's views

INDEX VOLUME 27 1981

A

ADA: software engineering language of the future? by Dennis Moralee 556
AGRs and high-temperature gas-cooled reactors by K. Dent 288
Application of CAD/CAM in a mechanical engineering company by R.H. Jackson 49
Application of microelectronics to automation and control of Metro production by J. Meleka 42
Applying new technology in a traditional industry — coal mining by Sir Derek Ezra 36
Atkinson, G.D.: Dealing with faults on LV cable networks 710
Atomic Energy Authority, the view from the top at the by L. Holmes 285
Automated telephone-subscriber line-testing system by R.H.T. Cartwright 615

B

Baggott, M.: Scotland — advantage and opportunity 820
Baggs, J.: Ball lightning (letter) 98
Baggs, J.: Electric and other vehicles (letter) 281
Baggs, J.: Steam-turbine electrics (letter) 98
Baird, Cmdr. A.S.: Shipborne guided-weapon-system development 534
Baker, W.F.: Wind energy (letters) 281, 598
Ball lightning (letter) 98
Ball, P.R., Pond, J.C., Sadler, A.A. and Culshaw, B.: (see Culshaw) 148
Barber, H.: Microwaves for cooking and heating 401
Barrett, D.: China Light & Power and BEI (letter) 782
BATES — a revolution in the control of artillery by Major C.E.E. Sloan 545
Beauchamp, K.G., John Sargrove — inventor of the first PCB 477
Beck, B.: Uninterruptible power supplies and the Heemaf system 554
Bell, D.A.: DoI's role in the development of new technology 19
Bellairs, Lt.Col. G.ff.: Motor madness (letter) 209
Bennetts, Dr. R.G.: The philosophy of testing digital systems — a pragmatic approach 162
Beresford, W.L.: The professions and unions (letter) 97
Bermange, M.S.: GEC 4090 — a computer is born 796
Bit-slice microprocessors, an introduction to by A. Clements 230
Blonstein, J.L., and Gregory, D.N.: Microwave engineering in the new generation of large satellites 407
Blower, R.W.: Experience with medium-voltage vacuum circuit-breaker equipment in distribution systems 728
Boldyreff, C.: Developing microprocessor software without tears 228
Boyes, J.: The eyes of the oil industry 484
Bradsell, P.: Microwave radar 367
Bramman, J.I.: Fast reactor 300
Bray, P.R.: In Retrospect (letter) 695
British Electricity International — selling technology transfer by L. Holmes 527
British Rail signalbox-to-train radio-communication system by L.J. Giles and R.E. Simson 611
Brown, J.: Radio reception (letter) 209
Brown, R.: Ceramic RF power monolithic capacitors 459
Bryant, J.A.: Microtechnology in museums (letter) 208
Bryant, P.E.: The ICF network 802
Bryce, A.B.: Wind energy (letter) 446
Bubbles bounce back?, will by L. Holmes 691
Burgess, B.: Trends in future airborne communication systems 608
Buying British (letter) 209

C

Candu system by R.A. Knox 297
Capacitors, ceramic RF power monolithic by R. Brown 459
Capacitors, the changing world of small by L. Holmes 452
Cappelini, V., and Constantinides, A.G. (Editors): Digital signal processing 491
Cartwright, R.H.T.: Automated telephone-subscriber line-testing system 615
CECC system for European electronic components by C. Weaver 471
CERL research cuts power costs by L. Holmes 364
Changes in the primary and secondary educational system by B. Samways 80
Changes in the tertiary education system by R. Lewis 84
Charge-balancing DVM for instrument applications by T. Emmens 166
China Light & Power and BEI (letter) 782
Circuit breaker, a rotating-arc SF_6 by J. Parry 725
Clark, B.: Critical role of connectors in modern system design 643
Clements, A.: An introduction to bit-slice microprocessors 230
Collie, A.A.: Microprocessor-based controls for white goods 236
Communication systems, trends in the design of equipment for by D.S. Bidler 32
Communication systems, trends in future airborne by B. Burgess 608
Content discontent (letter) 128
Control of voltage on a rural distribution system by F.J. Farrell 702
Critical role of connectors in modern system design by B. Clark 643
Cronshaw, K.: Electricity distribution in rural areas 713
Crosstalk 62, 160, 206, 279, 330, 359, 489, 490, 524, 600, 696, 785
Culshaw, B., Ball, P.R., Pond, J.C. and Sadler, A.A.: Optical-fibre data collection 148

D

Data-logging systems, design of portable by G. Peacock 155
Davies, R.: Millimetre waves 375
DBS dilemma by D. Moralee 447
Defence spending: asking the questions 515
Dent, K.: AGRs and high-temperature gas-cooled reactors 288
DoI's role in the development of new technology by D.A. Bell 19
Dorkings, C.: Engineer's status (letter) 523
Dow, R.I.: Triflid tactical radio-relay equipment 530
Drew, J.R.: It's a man's life (letter) 523
Drives, the choice in AC variable-speed by P.D. Shilston 739
Dudek, M.T., and Robinson, J.M.: A new adaptive circuit for spectrally efficient digital microwave-radio-relay systems 397
Dynamic product strategy by T. Wearden 813

E

Electric and other vehicles (letter) 281
Electric trains: green light at last 119
Electricity distribution in rural areas by K. Cronshaw 713
Electricity utility, credit and load management system for an by J.E. Tame 705
Electronic voltage standards by P.J. Spreadbury 140
Emmens, T.: Charge-balancing DVM for instrument applications 166
Energy conservation and efficiency (letter) 207
Engineering energy alternatives 119
Engineering incentives (letters) 207
Engineering satellite ground stations by C.B. Wooster 618
Engineer's status (letters) 358, 523, 695
Engineers, energy and public concern by Prof. J.S. Forrest 172
Engineers, energy and public concern (letters) 358, 523, 782
Exley, P.: Nuclear issue (letter) 445
Experience, a decade of PCB design by W.E. Hillier and W.S. Meadows 461
Ezra, Sir Derek: Applying new technology in a traditional industry — coal mining 36

F

Fabrication technologies for GaAs monolithic circuits by J.A. Turner 455
Farrell, F.J.: Control of voltage on a rural distribution system 702
Fast reactor by J.I. Bramman 300
Fellgett, P.B.: Radio reception (letter) 128
Forrest, Prof. J.S.: Engineers, energy and public concern 172
Forrest, J.S.: Engineers, energy and public concern (letter) 523
Fountain, V.A.E.: Oriental Phoenix? (letter) 97
Fowler, M.: Personal computer networks 805
Frary, D.J.: Guided-weapon control systems 538

G

Gas-cooled nuclear reactors, the use of microprocessors in by S.N. Todd 323
GEC 4090 — a computer is born by M.S. Bermange 796
Giles, L.J., and Simson, R.E.: British Rail signalbox-to-train radio-communication system 611
Goddard, S.C.: Pressurised-water-reactor generating station proposed for Sizewell 'B' 293
Good, E.F.: Engineering incentives (letter) 207
Government aid for industrial relocation by L.E. Walford 816
Granger-Bevan, B.: Engineer's status (letter) 695
Grant, L.J.: Technology investment (letter) 208
Green, D.R.: University engineering (letter) 97
Gregory, D.N., and Blonstein, J.L. (see Blonstein) 407
Griffin, D.: The role of the specialist distributor in microprocessor applications 475
Guided-weapon control systems by D.J. Frary 538
Gupta, C.: Microwaves in medicine 403
Gyrotron by M.J. Smith 389

H

Hampshire, M.J.: Role of microelectronics technology in vehicles 64
Harrison, A.I.: Lead-acid standby-power batteries in telecommunication — 'horses for courses' 551
Harrold, A.E.: Innumerate technician (letter) 209
Hawley, R.: Nuclear issues (letter) 445
High-level languages: a hardware man's view by D. Moralee 130
Hillier, W.E. and Meadows, W.S.: A decade of PCB design experience 461
Holford, K.: If it moves, microwaves will detect it 393
Holmes, L.: British Electricity International—selling technology transfer 527
Holmes, L.: CERL research cuts power costs 364
Holmes, L.: James Clerk Maxwell and electricity engineering 648
Holmes, L.: Microelectronics and the adversarial approach to industrial relations 24
Holmes, L.: Pumping heat electrically 810
Holmes, L.: The changing world of small capacitors 452
Holmes L.: The view from the top at the Atomic Energy Authority 285
Holmes, L.: Ultrasound in diagnostic medicine 210
Holmes, L.: What happens when the oil runs out? 125
Holmes, L.: Will bubbles bounce back? 691
Holt, P.: Nuclear issue (letter) 445
Howell, the Rt. Hon. David: Nuclear power and the UK's future energy requirements 282
How the other half dies (letters) 96, 128
Huggins, J., Lain, R.N., and Thomas, P.E.: (see Lain) 735

I

ICF network by P.E. Bryant 802
ICL story by D. Moralee 788
Industrial DC motor, the development of the by R.N. Lain, P.E. Thomas and J. Huggins 735
Industrial news 90, 121, 201, 273, 352, 437, 516, 589, 687, 777
In praise of new technology 17
In retrospect 31, 175, 205, 331, 363, 442, 525, 652, 697, 786
In retrospect (letters) 446, 596, 695
Instruments for measuring radio interference by D. Stodgart 169
Investing in new technologies — a personal perspective by Lord Weinstock 27
Israel's solar-energy programme by P. Walmsley 244
It's a man's life (letters) 358, 523, 596

J

Jackson, R.H.: Application of CAD/CAM in a mechanical engineering company 49
Jaguar V frequency-hopping radio by E. Ribchester 627
Jay, M.A.: Lithium/thionyl-chloride cells 549
Jervis, M.W.: The case for remote multiplexing (letter) 523
John Sargrove — inventor of the first PCB by K.G. Beauchamp 477
Joint European Torus by D.L. Smart 304
Jones, B.E.: Optical fibres and electro-optics for instrumentation 143
Jones, W.S.: University engineering (letter) 208
Joseph, Rt. Hon. Sir Keith: Microtechnology and industrial opportunity 15
Jupe, J.H.: Engineer's status (letter) 523

K

Kerr, A.N.D.: Pat on the back (letter) 782
Kibble, B.P.: New amps for old 136
Knox, R.A.: Candu system 297

L

Lain, R.N., Thomas, P.E., and Huggins, J.: The development of the industrial DC motor 735
Langridge, F.R.J.: Technology investment (letter) 208
Lead-acid standby-power batteries in telecommunication — 'horses for courses' by A.I. Harrison 551
Leggatt, D.P.: Radio reception (letter) 128
Lewis, R.: Changes in the tertiary education system by R. Lewis 84
Lilly, C.J.: Making light work — optical-fibre systems in the British Telecom network 630
Lithium/thionyl-chloride cells by M.A. Jay 549
Live working at high voltage, bare hands and hot sticks: by J.S.T. Looms 708
Lloyd, R.H.: How the other half dies (letter) 96
Looms, J.S.T.: Bare hands and hot sticks: live working at high voltage 708
Losty, H.H.W.: How the other dies (letter) 128
Lush, D.M.: Microprocessors for building services and energy conservation 75
LV cable networks, dealing with faults on by G.D. Atkinson 710

M

MacFarlane, A.G.J. (Editor): Frequency-response methods in control systems 491
Maclaren, C: The case for remote multiplexing 326
Macleod, A.: It's a man's life (letter) 358
Maddock, B.J.: Optical fibres on overhead power lines 635
Mallett, B.: Terminal strips meet many demands 641
Mallinson, S.R., and Millar, C.A. (see Millar) 637
Manley, B.W.: Technology and the office of the future 59
Manson, G.: How the other half dies (letter) 96
Matthews, R.R.: Nuclear safety — policy and practice 313
Maxwell and electrical engineering (letter) 782
Maxwell-Adams, J.: In Retrospect (letter) 596
Maxwell, James Clerk, and electrical engineering by L. Holmes 648
Mayo, R.: Engineers, energy and public concern (letter) 358
Mayo, R., Surface-acoustic-wave devices in electronic systems 464
Meadows, W.S. (see Hillier) 461
Meleka, J.: Application of microelectronics to automation and control of Metro production 42
Memory testing, interactive software for automatic by A. Parkinson 473
Microelectronics and the adversarial approach to industrial relations by L. Holmes 24
Microprocessor applications, the role of the specialist distributor in by D. Griffin 475
Microprocessor architectures: ten years of development by D. Moralee 214
Microprocessor-based controls for white goods by A.A. Colli 236
Microprocessor-based product design by C. Thomas 240
Microprocessor family, NSC800 — a low-power high-performance by Col Rada 222
Microprocessor software without tears, developing by C. Boldyreff 228
Microtechnology and industrial opportunity by Rt. Hon. Sir Keith Joseph 15
Microtechnology in health care by J.A. Newell 70
Microtechnology in museums (letter) 208
Microwave attenuation standards by F.L. Warner 371
Microwave engineering in the new generation of large satellites by J.L. Bionstein and D.N. Gregory 407
Microwave era, the second 351
Microwaves will detect it, if it moves by K. Holford 393
Microwave radar by P. Bradsell 367
Microwave-radio-relay systems, a new adaptive circuit for spectrally efficient digital by M.T. Dudek and J.M. Robinson 397
Microwaves for cooking and heating by H. Barber 401
Microwaves in medicine by C. Gupta 403
Middleton, H.I.: Engineers, energy and public concern (letter) 782
Military connectors, industrial applications for by D. Taylor 645
Millar, C.A., and Mallinson, S.R.: Optical-fibre connectors for telecommunication 637
Miller, P.: Maxwell and electrical engineering (letter) 782
Millimetre waves by R. Davies 375
Monolithic microwave circuits by R.S. Pengelly 379
Monzingo, R.A., and Miller, T.W. Introduction to adaptive arrays 491
Moralee, D.: ADA: software engineering language of the future? 556
Moralee, D.: DBS dilemma 447
Moralee, D.: High-level languages: a hardware-man's view 130
Moralee, D.: Microprocessor architectures: ten yers of development 214
Moralee, D.: Post Office telecommunication — the end of the line 601
Moralee, D.: Post Office telecommunication — the telephone era 698
Moralee, D.: The ICL story 788
Mortley, W.S.: Engineering incentives (letter) 207
Motor madness (letter) 209
Multiplexing, the case for remote by C. Maclaren 326
Myerscough, P.B.: Simulators for nuclear-power station training 316

N

New amps for old by B.P. Kibble 136
New products 101, 179, 251, 335, 415, 493, 565, 659, 747, 831
Newell, J.A.: Microtechnology in health care 70
Nicholas, J.R.: In Retrospect (letter) 596
Notley, D.S.: Solderless package concept 640
Nuclear energy — past present and future by Sir Francis Tombs 283
Nuclear fuel cycle: Its role in electricity generation by J.A. Preece 310
Nuclear issue (letter) 445
Nuclear non-programme, the Select Committee's 199
Nuclear power and the UK's future energy requirements by the Rt. Hon. David Howell, M.P. 282
Nuclear-power-station control by D.S. Hiorns 319
Nuclear safety — policy and practice by R.R. Matthews 313

O

Oil industry, the eyes of the by J. Boyes 484
Operating a modern, private electricity supply utility by F.T.F. Wiggin 732
Optical-fibre connectors for telecommunication by C.A. Millar and S.R. Mallinson 637
Optical-fibre data collection by B. Culshaw, P.R. Ball, J.C. Pond and A.A. Sadler 148
Optical fibres and electro-optics for instrumentation by B.E. Jones 143
Optical fibres on overhead power lines by B.J. Maddock 635
Optical-fibre systems in the British Telecom network, making light work by C.J. Lilly 630
Oriental Phoenix? (letter) 97
Our neighbour's grass is greener (letter) 281
Out of sight, out of mind 685
'Own goal' by CEGB's critics 435

P

Palmer, C: The innumerate technician (letter) 98
Parkinson, A.: Interactive software for automatic memory testing 473
Parry J.: A rotating-arc SF_6 circuit breaker 725
Pat on the back (letter) 782
PCB, the dangers of (letter) 695
Peacock, G.: Design of portable data-logging systems 155
Pearson, D.E.: Transient recorders — the ultimate in waveform capture 158
Pengelly, R.S.: Monolithic microwave circuits 379
Personal computer networks by M. Fowler 805
Phillips, A.J.: The work of the Welsh Development Agency 823
Phillips, V.J.: Physiological radio receivers 409
Physiological radio receivers by V.J. Phillips 409
Pollock, J.: 'Silicon Glen' — Scotland's latest attraction 825
Polymeric cables, development of joints for medium voltage by A. Ross 721
Pond, J.C., Sadler, A.A., Culshaw, B., Ball, P.R.: (see Culshaw) 148
Post Office telecommunication — the end of the line by Dennis Moralee 601
Post Office telecommunication — the telephone era by D. Moralee 698
Preece, J.A.: Nuclear fuel cycle: its role in electricity generation 310
Pressurised-water-reactor generating station proposed for Sizewell 'B' by S.C. Goddard 293
Preston, H.S.: How the other half dies (letter) 96
Pumping heat electrically by L. Holmes 810

R

Rada, Col: NSC800 — a low-power high-performance microprocessor family 222
Radio reception (letters) 128, 209
Rees, D.W.: The dangers of PCB (letter) 695
Reliability achievement (letter) 129
Ribchester, E.: Jaguar V frequency-hopping radio 627
Richards, A.J.: Content discontent (letter) 128
Richards, C.: Stay the course! (letter) 129
Ridler, D.S.: Trends in the design of equipment for communication systems 32
Robinson, J.M., and Dudek, M.T.: (see Dudek) 397
Roden, A.C.: Buying British (letter) 209
Role of microelectronics technology in vehicles by M.J. Hampshire 64
Ross, A.: Development of joints for medium voltage polymeric cables 721

S

Sadler, A.A., Culshaw, B., Ball, P.R., Pond, J.C.: (see Culshaw)
Samways, B.: Changes in the primary and secondary educational system 80
Scotland — advantage and opportunity by M. Baggott 820
Shaw, Lt. Cdr. W.R.: Reliability achievement 129
Shilston, P.D.: The choice in AC variable-speed drives 739
Shipborne guided-weapon-system development by Cmdr. A.S. Baird 534
'Silicon Glen' — Scotland's latest attraction by J. Pollock 825
Simson, R.E., and Giles, L.J.: (see Giles) 611
Simulators for nuclear-power station training by P.B. Myerscough 316
Sloan, Major C.E.E.: BATES — a revolution in the control of artillery 545
Smart, D.L.: Joint European Torus 304
Smith, M.J.: Gyrotron 389
Snowball, W.R.: Engineer's status (letter) 358
Solderless package concept by D.S. Notley 640
Spreadbury, P.J.: Electronic voltage standards 140
SSB modulation for VHF mobile and handportable transceivers by R. Wells 605
Stammers, T.P., and Tilbury, C.R.: (letter) (see Tilbury) 207
Stay the course! (letter) 129
Steam-turbine electrics (letter) 98
Stoddart, D.: Instruments for measuring radio interference 169
Surface-acoustic-wave devices in electronic systems by R. Mayo 464
Sutherland, P.: It's a man's life (letter) 596
Swift-Hook, D.T.: Energy conservation and efficiency (letter) 207

T

Tame, J.E.: Credit and load management system for an electricity utility 705
Taylor, D.: Industrial applications for military connectors 645
Technology and the office of the future by B.W. Manley 59
Technology investment (letter) 208
Telecommuniction: getting what you pay for 587
Terminal strips meet many demands by B. Mallett 641
Testing digital systems — a pragmatic approach, the philosophy of by Dr. R.G. Bennetts 162
The case for remote multiplexing (letter) 523
The future office (letter) 98
The innumerate technician (letters) 98, 209
